EXPERIENCE

Associate Network AI/ML Engineer

August 2025 – May 2026

T-Mobile

Frisco, TX (Remote)

- Engineered a hybrid anomaly detection pipeline in **Snowflake** by integrating a **supervised XGBoost classification layer** over an **unsupervised Isolation Forest**, reducing false positive alerts by **20%** and achieving **>80% precision**
- Built PRISM-AI, an **MCP-based agentic GenAI chatbot** using **Anthropic Claude** and **Streamlit**, allowing network engineers to query live Snowflake anomaly data across **2M+** rows of Ericsson and Nokia telemetry via natural language
- Partnered cross-functionally with network operation teams to validate ML inferences against live operational telemetry, optimizing overall system reliability and ensuring the accuracy of anomaly detection results

Associate Network AI/ML Engineer Intern

May 2025 – August 2025

T-Mobile

Frisco, TX

- Developed **time-series forecasting models** to predict network demand and detect anomalies in high-scale pipelines, managing datasets of **2 billion+ rows** to enable near **real-time decision support** for slice orchestration
- Engineered robust, low-latency (**<5 min**) end-to-end **ETL** pipelines for 5G data ingestion using **Python** scripting and **SQL stored procedures** from internal OSS networks to **Azure Blob Storage**, **Snowflake**, and **PostgreSQL**
- Presented analytical findings and interactive **Streamlit** visualizations to senior leadership, translating complex data insights into actionable business intelligence that resolved **12+ critical issues**

Data Analyst Intern

June 2024 – August 2024

Milliman

Minneapolis, MN

- Conducted comprehensive statistical analysis of **20+ numerical datasets** exceeding **100,000 rows** using **R**, **Excel**, and **SAS**, enhancing the accuracy of Long-Term Care insurance reports through rigorous validation
- Reconstructed and verified datasets for GLM model in **Excel** utilizing **PowerQuery** and **pivot tables** to ensure accuracy
- Collaborated with actuaries to align data interpretations with business assumptions, ensuring **100%** reporting consistency across **5+** Long-Term Care insurance portfolios

PERSONAL PROJECTS

SoCal Context-Aware Trip Planner | *Neo4j, Cypher, Python, Streamlit, pandas, REST APIs, NLP* May 2026

- Engineered a scalable recommendation engine using an **11-node Neo4j** property graph, enabling low-latency, multi-hop constraint analysis across **1,400+** points of interest
- Architected a dynamic, user-centric interface in **Streamlit** that utilizes complex geospatial and temporal Cypher queries, allowing for real-time validation of travel feasibility against shifting environmental constraints

Cinesync | *React, FastAPI, ChromaDB, OpenAI API, Python*

April 2026

- Built a AI group chat system for film production location management, integrating a **agentic RAG-based pipeline (ChromaDB) with GPT-4o mini** to deliver real-time compliance reports covering FilmLA permits, TMZ zone status, noise ordinances, and union rules
- Implemented a full-stack location intelligence platform (**React + FastAPI**) featuring multi-role chat, image upload with live vision analysis, and a GPS-based TMZ boundary lookup tool with automated per-crew budget impact calculations

EDUCATION

University of Southern California

May 2026

Master of Science in Applied Data Science

- Coursework:** Foundations of Data Management, Machine Learning for Data Science, Applied Natural Language Processing, Foundations and Applications of Data Mining, Building Knowledge Graphs

University of California, Santa Cruz

June 2024

Bachelor of Science in Computer Science: Game Design

GPA: 3.92

- Honors:** Magna Cum Laude (Top 3% of graduating class, Jack Baskin Engineering School)

SKILLS

Languages: Python, SQL, C/C++, C#, JavaScript

Machine Learning & Data Engineering: PyTorch, Scikit-learn, Apache Spark, Apache Hadoop (MapReduce), Snowflake, ChromaDB, NLP, Graph Databases (Neo4j)

Cloud & Infrastructure: AWS, Google Cloud Platform (GCP), Azure, Linux (Ubuntu), Docker, Git

Web & APIs : FastAPI, React, Streamlit, Flask
